## Profile

Detail-oriented Senior Frontend Engineer with a strong academic background in biotechnology and biomedical engineering from prestigious Indian Institutes of Technology. Bringing nearly 2 years of frontend development experience and a track record of successful projects. Eager to contribute to Aspire's mission of reshaping its business.

## Professional Experience

(January 2021 – Present)

### Frontend Engineer

Edukit- Noida, India

- Collaborated on the development of several successful websites, including:
  - ucidigital.in,
  - prepcareer.in,
  - clctecno.com,
  - apnajahan.org
- Integrated RESTful APIs into these websites, optimizing data flow and ensuring seamless user experiences.
- Played a pivotal role in building innovative web applications, focusing on Vue.js and other frontend technologies, and also focus on mobile-responsiveness.
- Actively involved in the entire web application development life cycle, from concept to delivery and post-launch support.
- Worked within a startup environment providing Ed-Tech solutions to schools and coaching institutes, gaining exposure to agile methodologies.

### Skills

- Proficient in Vue.js, JavaScript, and CSS
- Strong knowledge of RESTful API design and implementation
- Working knowledge of Git for version control
- Exposure to agile methodologies and startup experience
- Basic familiarity with mobile technologies
- Good communication and collaboration skills
